WALLPAPER RAILS 5 business days - Client Built			
	Home Page Takeover		ROS / Landing Pages Detail Takeover
Notes	Impression trackers are not accepted.		
Clickable area	Only in 970x250 header; no calls to action in the rails/gutters	Only in 970x250 header; no calls to action in the rails/gutters	
Building Takeover Wallpaper Rails	<ul style="list-style-type: none"> <li>Client builds wallpaper. Hollywood.com's requires TWO sizes to optimize display on different device sizes (1996px x 1000px for 1024px-1368px displays and 2170px x 1000px for 1368px+ displays).</li> <li>The recommended "live area" is 175px left and right from the site's inner content. This should contain your main branding and call to action. The image extends an additional 325px into the "bonus area" on both sides for larger displays.</li> <li>The background color of the Rails is white by default. Upon request, it may be changed to black or another color. This color must be consistent with the wallpaper and the site as a whole. While the color of the Rails may be customized, the center content background must remain white.</li> <li>The center of the wallpaper image displays "behind" the page content and is not shown. This area must be kept blank to minimize the file size of the creative.</li> <li>The Rails will scroll with the page by default. Upon request the wallpaper may run in a fixed position (no scrolling). If fixed, the main messaging must be placed at appropriate height to be seen on most users' screens.</li> <li>The Rails will have no click-through URL by default. Upon request a click-through URL may be added.</li> </ul> <p><b>Please note that the 970x250 header and the wallpaper rails are not seamless. There is a white border (padding) between them.</b></p>		
	Specs	File Size	Clickable
Header	970x250 ad size - 3rd party tag	60k flash / 50k bacbkup	Yes
Wallpaper Rails	2170x1000 background/wallpaper	under 400K	No
